

**Multi-Author Duplicate
Examiner Plugin For
WordPress Websites
Installation & Usage
Guide**

Thanks for purchasing the Multi-Author Duplicate (MAD) Examiner Plugin.

I hope you get to use and extend your content more, and tailor it to each new audience accordingly.

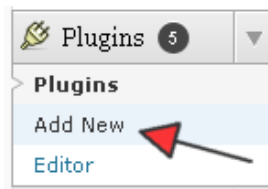

I also use this plugin extensively in my [blog coaching](#). Not only can you see your own edits, if you wish to learn from the editing process the MAD Examiner highlights the changes which means you can learn from the editing process and become a better blogger.

Enjoy ☺

Sarah

How to Install A Plugin on Your Wordpress Site

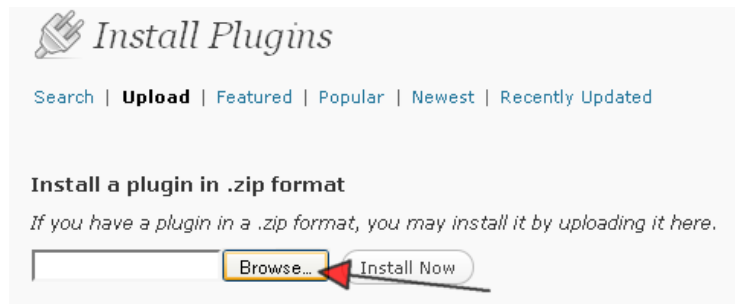

Download the zipped Duplicate Examiner plugin to your computer. Log in to your WordPress site. Hover over the Plugins tab to expand, then click Add New.

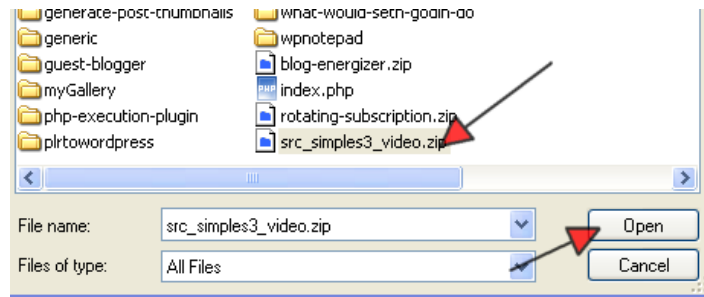

Select the Upload option

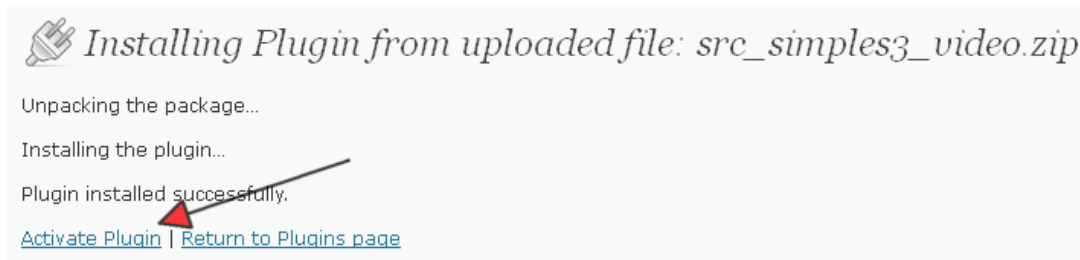

Click Browse

Locate the zipped MAD Examiner plugin file (the file will begin with SPP, don't ask why, it's a long story that's filled with many broken file names), select it then click Open. (illustration shows a different plugin but process is the same)

Your plugin will now be uploaded and installed. Your next step after installation is to click the Activate Plugin link

Alternative Setup - FTP

If installing from WordPress does not work for your blog, you may also do it the old fashioned way by first unzipping the MAD Examiner plugin file to your computer. Open your FTP software and upload the entire "spp-duplicate-examiner" folder to your WordPress plugin directory which will look like this file path inside your FTP software.

<http://www.yourblog.com/wp-content/plugins/>

Once upload has completed, log in to WordPress admin, navigate to Plugins. Locate Multi Author Duplicate Examiner and click Activate.

Usage

Upon activation, each time you create a new post or edit an old post, you will see the

following on your screen under the content box and in the sidebar.

a) The original content and change highlighter box at the bottom of the editor

Duplicate Examiner

Click to view changes

Check this box to copy content from post ☐

Original article

How Different Is My Content?

Without stop words:

Your post is **47%** similar or **53%** different than the original

With stop words:

Your post is **72%** similar or **28%** different than the original

b) The changed percentage box to the right

To start, paste original content in plain text into the original content box. If the content is already in the editor, you may also click the check box to automatically add the content to the original box. Note: You must first save the post before the copy feature will work.

Duplicate Examiner

Click to view changes

Check this box to copy content from post ☐

Original article

Save your post once again, then begin to edit your post in the editor as you would normally. For best results, do not apply formatting or images to your post. Duplicate Examiner will attempt to only compare content without formatting. Be aware, it cannot recognize certain things like WordPress shortcodes. It will assume it is a word or part of a word. If you add images with captions or shortcodes and other formatting, it might skew your changed content percentage.

With each Save you make, MAD Examiner will report the percentage of change in the changed percentage box, both including stop words and excluding them. Stop words are words commonly found in a post or article and generally skipped over by search engine bots.

To view the changes you made, scroll down to the original content box. Click the Click to view changes button.

You will get a display of content changed, edited and removed. Edited text appears in red, added or current text appears in green.

I don't know ~~whether~~ if you have ever seen a map of a person's mind. Doctors sometimes draw maps of other parts of you, and your own map can become ~~intensely~~ richly interesting, but catch them trying to draw a map of a child's mind, which is not only confused, but keeps going round all the time. There are zigzag lines on it, just like your temperature on a card, and these are probably roads in the island, for the Neverland is always more or less an island, with ~~astonishing~~ frightening splashes of ~~colour~~ color here and there, and coral reefs and rakish-looking craft in the offing, and savages and lonely lairs, and gnomes who are mostly tailors, and caves through which a ~~river runs,~~ river.

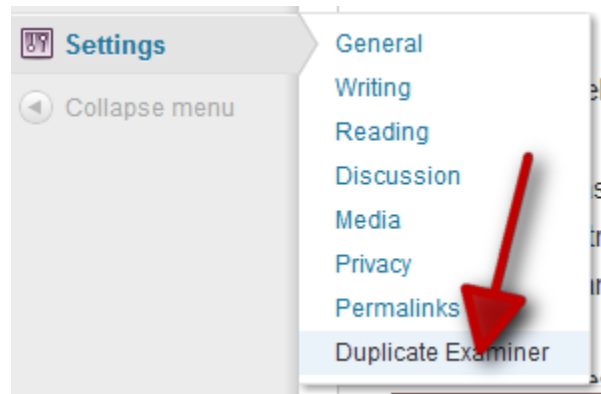

And now I'll insert a hugely paragraph in here to skew things and ~~princes with six elder brothers, and a hut fast going~~ make it really different or at least hope to ~~decay, and one very~~

The plugin comes with a set of common stop words. This can be edited, added to or changed completely by you. To edit stop words, while logged in as WordPress admin, go to Settings > Duplicate Examiner

Modify, change or add to the words in the box. Please make sure each word is separated by a comma and space.

Duplicate Examiner Options

Enter a list of common words separated with a comma

Want to get a list post created faster? At the moment I'm loving [Curasoft](#) ☺ It helps you create fantastic curated posts, and you can use it will all websites not just WordPress! How cool is that? What's more there is a free version of Curasoft so you can try it out for nothing.

Ebooks your thing? Well they should be 😊 More ebooks are sold now than print books – you can easily repurpose your blog posts into awesome ebooks and even sell them on Amazon Kindle.

There are several places you can go for ebook covers. You can get a pretty good cover on Fiverr.com. Of course, you'll check the feedback of the [ebook cover](#) creator and that the seller is capable of the design that you require.

My preferred tool for ebook covers is [MyECoverMaker](#). For \$10 / £6.50 a month you can make as many ebook covers as you like, along with DVD covers and [membership site](#) cards. Making your [ebook cover](#) is quick and simple, within minutes you can create an excellent cover. There is a range of backgrounds / stock imagery that you can use or you can upload your own. Did I mention there is a limited free version as well? Another way to try before you buy or just grab a few covers for your upcoming projects at no cost 😊

This is an excellent tool and I highly recommend it.

Sexy looking ebooks and reports

If you've bought any of my Kindle guides or grabbed your [free copy of Successful Business Blogging](#), then you'll know how great ebooks and free/special reports can look.

Again there is a fast way to create the ebooks and make them look great, and that's using [Product Creator Pro](#).

If you don't create a lot of information products or special reports then grab a copy of [Zero to Ebook](#), where I detail how to make your ebooks look terrific using Microsoft Word. But if you are creating 2 or more a month, then you need [Product Creator Pro](#).

It also makes converting your ebook to Kindle so easy it's unreal. If you have several ebooks and you want to add them to Kindle then this is the perfect tool for you. It's not too expensive at £30/\$49 a month and it's an exceptional time saver. Again there's a free option, go and check it out – try before you buy.

Of course if you have yet to write that ebook you can start with [Zero to Ebook](#).

Zero to Ebook is my best selling ebook of all time. Simply take a look at the sales page here and see if your questions surrounding ebooks are answered, if so then grab a copy quick.
